

GoodWeave International License Fee Schedule

June 2017

Importer license fee	1.75% of the FOB import value of all certified product imported plus applicable VAT tax OR the minimum annual license fee, whichever is greater.
Exporter application fee	\$150 upon submission of the application for license.
Exporter license fee	0.25% of the invoice price/FCA value of the certified product OR the minimum annual license fee (\$100), whichever is greater.
Dormant licensee fee	Minimum annual fee for dormant licensees: \$500

License fees are detailed within each license agreement. The minimum annual license fees contribute to the administrative costs of maintaining the license agreement.

The minimum annual license fees for exporters are charged at the end of the year. Any license fees paid for certification labels issued during the preceding 12 month period count towards the minimum annual license fee, with the exception of the annual fee for Nepal exporter licensees, which is charged separately.

As specified in the GWI Policy on Dormant Licensees, exporters that have not used GoodWeave certification labels for two consecutive years are placed in dormant status and contribute a higher minimum annual license fee level as specified in the above schedule. The dormant licensee fee is charged at the beginning of the year.

The application fee must be paid each time a new application is submitted (including companies seeking to be re-licensed after previously having been de-licensed).

All license fees must be paid before the GoodWeave license may be renewed.
